

IMHP (Improving Mental Health Provision CIC) Sub-Committee Form

We have set out provision for a Sub-Committee comprised of key professionals from our Core and Casual Teams, key professionals who are not formally part of IMHP due to the nature of their work, their employer's regulations, and/or personal choice, and individuals who have a long history of being clients of the mental health or related services. The objectives of this sub-committee are as follows:

- To ensure that our decision making board is informed by a diverse and relevant range of individuals and agencies in regard to best practice, protocol, policy, delivery, safeguarding, local services, the community, and any relevant matters.
- To instigate and facilitate constructive dialogue between various services and between these services and the individuals who use them.
- To establish and maintain partnerships and collaborations in the interest of better supporting the community.

Sub-committees will be invited to all general and open meetings for their input to be factored in with that of directors, members, associates, and in the case of open meetings the general public. They may also be included in director's meetings when the topic of discussion relates to their areas of expertise. Provision for inclusion of sub-committees as non-associated advisors has been made in the articles of association to protect their interests.

Information contained in this form will be kept in accordance with the Data Protection Act 1998, treated confidentially, and will not be shared with any other individuals or organisations.

Reason for application to become an associate (in regard to mental health this could be personal or professional experience, association with another organisation or service, etc.)
